

# Mixer Rollover Awareness & Prevention Programme (RAPP)

MixerSURE<sup>©</sup>

# Introduction

Of all the transport-related incidents within our industry, mixer rollovers are the ones that we've failed to tackle over the years and are a problem that just keeps coming back.

A new approach is required due to the increased number of rollover incidents suffered across the industry, not just focusing on the inexperienced driver but a chance to refresh the knowledge and understanding of the more experienced one.

Improving safety, raising awareness, reducing costs and improving productivity are some of the main reasons why the Rollover Awareness and Prevention Course should be implemented across your business.

RAPP© from the British Aggregates Association (BAA) and in partnership with MinTrain™ and TVS Interfleet, gives a greater understanding of the root causes of the problems we face and how we reduce and eliminate mixer rollovers.

# What Is It?

Developed by MinTrain™ and McPhee Mixers, for the BAA Concrete Division, the half-day Rollover Awareness & Prevention Programme is an interactive and engaging course that looks at the root causes of mixer rollovers and gives attendees an opportunity to help bring change in reducing the number of these incidents.

Using the real-life footage of incidents involving concrete mixers, the course requires attendee participation and interaction to bring out the maximum benefits of the course learning outcomes and objectives.

Key learning points are discussed, and look at rollover causes using investigation scenarios and implementing preventative measures to reduce mixer rollover incidents across the industry.

The Rollover Awareness and Prevention Course is Europe's only course that meets the requirements of BS EN 12609:2021 Truckmixer Safety Requirements.

# What It Covers

RAPP covers the following core elements of the full MinTrain™ MixerSURE© Rollover Programme, including:

- Rollover Statistics & Causes
- What Makes The Industry Unique
- Collision Avoidance Techniques
- SSDM (Split Second Decision Making)
- Interactive Learning Points
- Rollover Contributing Factors
- Load Stability
- Site Conditions and Hazard Spotting
- Rollover Investigations Scenarios
- Key Learning Points
- Preventative Measures
- Knowledge Check

# Accreditation

The MinTrain™ multi-award-winning specialist MixerSURE© training has been fully accredited by Industry Awarding Body and BAA member EMPI Awards.

MixerSURE© is also recognised and accredited by the Driver and Vehicle Standards Agency (DVSA), adding further credibility and assurance that MixerSURE© sets the highest standard.

# Certification

Attendees who successfully complete the Rollover Awareness & Prevention Course will be issued with a certificate of attendance and completion.

The certificate features a white background with blue and dark blue geometric accents in the top-left and bottom-right corners. At the top left, there is a logo for the British Aggregates Association. To its right is the TVS Interfleet logo. The word 'CERTIFICATE' is prominently displayed in large, bold, blue capital letters, with 'OF COMPLETION' in smaller, grey capital letters below it. The name 'Joe Thompson' is written in a large, bold, black font, underlined. Below the name, the text states: 'Has attended the 4-hour Mixer Rollover Awareness and Prevention Programme (RAPP) on Monday, 22nd May 2023.' A paragraph follows: 'This course covers the principles of mixer rollover causes and preventative measures, and the named attendee has successfully completed the Rollover Awareness and Prevention knowledge check.' At the bottom, there are three logos: CLOCS Strategic Partner, MixerSURE DVSA RECOGNISED, and a signature for Mark Cowan, Director of Transport, Logistics & Concrete.

 

## CERTIFICATE

OF COMPLETION

### Joe Thompson

Has attended the 4-hour Mixer Rollover Awareness and Prevention Programme (RAPP) on Monday, 22nd May 2023.

This course covers the principles of mixer rollover causes and preventative measures, and the named attendee has successfully completed the Rollover Awareness and Prevention knowledge check.

    
Mark Cowan  
DIRECTOR OF TRANSPORT,  
LOGISTICS & CONCRETE
